Github: https://github.com/Suhanataneja02 Mobile: +91-6284602861

Skills

Languages: Python, Shell Scripting, C++
Technologies/OS: Linux OS (Kali, Ubuntu), Windows OS, Cryptography, Steganography, Networking
Tools: Nmap, Wireshark, Burp Suite, Gobuster, Hydra, SQLmap, John the Ripper, ExifTool
Soft Skills: Multitasking, Teamwork, Time Management, Adaptability

Projects

Phishing Website Detection System | GitHub | Live Demo Mar 2026
- Developed a system to detect and classify phishing websites to help users identify malicious URLs and prevent online fraud.
- Developed a Python-based ML model with a Flask interface to detect phishing URLs.
- Successfully created a tool capable of predicting whether a website is legitimate or phishing, improving user awareness and web security.

Tech: Python, Machine Learning, Flask, HTML, CSS

Research Paper- Study on Advancements and Challenges in Quantum Cryptography | Github Aug 2025
- Studied the potential of quantum cryptography to address future security and post-quantum threats.
- Analyzed QKD (BB84), compared classical, quantum, and hybrid encryption, and examined challenges like noise, hardware limits, and scalability.
- Found that quantum cryptography can outperform traditional systems as technical limitations are gradually resolved.

Tech: QKD (BB84), Quantum Cryptography, Classical & Hybrid Encryption, Security Analysis

Smart door lock system using Arduino Uno Microcontroller integrated with GSM Module | Github Jan 2024
- Designed a secure and efficient door locking system using an Arduino Uno microcontroller with remote alert capabilities.
- Developed a system using Arduino Uno integrated with a GSM module to enable secure authentication and send real-time SMS alerts for unauthorized access.
- Achieved a reliable, cost-effective smart security solution suitable for residential and institutional environments.

Tech: Arduino Uno, Keypad Module, GSM Module, Buzzer, Embedded C

Certification

- Privacy and Security in Online Social Media | NPTEL | Certificate Nov 2025

Certificates

- Ethical Hacker | Cisco Networking Academy | Certificate Mar 2026
- Cyber Job Simulation | Deloitte | Certificate Feb 2026
- Advent of Cyber 2025 | Try Hack Me | Certificate Dec 2025
- Research Paper author | ICSIT | Certificate Aug 2025
- Python Programming with OOPS | Cipher Schools | Certificate July 2025
- Pre Security | Try Hack Me | Certificate July 2025
- Encrypted Warfare | Lovely Professional University | Certificate Mar 2025
- Cyber Security and Ethical Hacking | Secuneus Tech | Certificate Sept 2024

Achievements

- Solved 74 picoCTF challenges (52 Easy, 22 Medium) within 3 days Dec 2025
- Successfully completed Advent of Cyber 2025, solving all 24 cybersecurity challenges Dec 2025
- Published a research paper titled “A Comprehensive Study on Advancements and Challenges in Quantum Cryptography” in IEEE Xplore Dec 2025
- Achieved Top 5% rank in Try Hack Me Nov 2025
- Participated in Encrypted Warfare CTF held at Lovely Professional University Apr 2025
- Participated in the Nullcon CTF event organized by BITS Pilani Goa in Online Mode Mar 2025

EXTRACURRICULAR ACTIVITIES

- Gained hands-on exposure in Ethical Hacking and Cybersecurity by VaultofCodes online workshop Nov 2025
- Completed an Online quiz of MyGov related to Cyber hygiene Sept 2025
- Attended Cyber Security and Ethical Hacking and Cyberwise: Protect and Connect in the University Jan 2025

Education

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.51 August 2023 - Present

MGN Public School Jalandhar, Punjab
Intermediate; Percentage: 84% April 2022 - March 2023

St Joesph’s Convent School Jalandhar, Punjab
Matriculation; Percentage: 90% April 2019 - March 2020
